

SUN GUARD® AWNINGS

PRODUCT
UPDATE

ABS Sun Guard® Window
Awnings not only add a special decorator touch to homes, they block out damaging infrared sun rays that cause furniture damage, carpet and drape fading. Unprotected windows are also one of the biggest causes of high heating and cooling bills. Sun Guard® awnings installed on your home can help reduce your utility bill, up to 25%, while at the same time giving you better protection against rain damage.

State-of-the-art features include carefree, all aluminum construction... lockseam understructure supports, one full inch square... stainless steel fasteners... anodized extrusions, and up to 14 colors to choose from.

Sun Guard® awnings are precision engineered with strict quality-control standards. And, when you choose Sun Guard® you can save as much as 40% compared to competitive awnings... without having to sacrifice quality, utility, or beauty. For awnings that make a difference, look to Sun Guard®. It's as easy as ABS.
